

AFTER EDEN

by Dan Lietha

Noah at a pre-Flood press conference.

Learn about Noah's Flood!

What would it be like to experience the flood?

See an "Interview with Noah"

Featuring the "Mt. St. Helens" DVD by scientist Dr. Steve Austin

We'll be Serving Hot Dogs, Brats, and Sausages!

Bring a dish to share.

HOT DOG, IT'S MOVIE NIGHT!

Come Close Out the Week of VBS and Learn About Noah's Flood with a Movie and Potluck!

Have you ever wondered what Noah's Flood was like? How did it change our world? See an "Interview with Noah" and get an idea of what it might have been like to experience the flood! What does geology and the fossil record tell us about the flood and the age of the earth? Does it confirm the Biblical account of the flood? When Mt. St. Helens erupted in 1980, it gave scientists an excellent laboratory to understand the global flood and the formation of features like the Grand Canyon. We'll be featuring a DVD called "Mt. St. Helen's" by Dr. Steve Austin, (one of the scientists featured in "Is Genesis History?"). All ages are welcome, but the "Mt. St. Helens" DVD will probably be most appropriate for those Junior High and up. Presented by the Denver Society of Creation.
