**Topic: “ Time, Ecology and Martin Luther”**

Accepted as a "given" in most schools, museums, parks, TV nature programs, and "news" stories (and by many churches and all atheists), belief in "vast ages" is based on evidence so scientifically flawed that it helped complete Dr. Parker's conversion "From Evolution to Creation" during his doctoral studies in biology/geology as an NSF Fellow. The real evidences in science, from Time to Ecology, point back to Martin Luther's faithful trust in God's Purposeful Creation during the Six Days of Genesis 1!

**About Dr. Parker:**

Dr. Gary E. Parker is Chief Science Educator and Co-founder of Creation Adventures Museum. He has a B.A. in Biology/Chemistry (high honors) from Wabash College, Crawfordville, IN, an M.S. in Biology/Physiology, and an Ed.D. in Biology with a cognate in Paleontology from Ball State University. Dr. Parker earned several academic awards, including admission to Phi Beta Kappa (the national scholastic honorary), election to the American Society of Zoologists (for his research on tadpoles), and a fifteen-month fellowship award from the National Science Foundation.

He has taught biology at Eastern Baptist College, Dordt College, Christian Heritage College, Clearwater Christian College, and the Institute for Creation Research (ICR) Graduate School. At present, in addition to his duties with Creation Adventures Museum, he serves as an adjunct professor with ICR.

Over the last 20+ years, Dr. Parker has authored or co-authored 15 books on origin related topics. In addition, he has appeared in numerous films/TV programs and has debated and lectured worldwide on creation. He also served as Senior Lecturer with Answers in Genesis (AIG) in Cincinnati, Ohio, from its beginning in 1994 until 1999. Dr. Parker has always been a sought-after speaker because he began his career as an atheist and evolutionist and is an excellent communicator of sometimes difficult concepts and data.
