Genesis: Impact!

It's Movie Night!

Bring your children and grandchildren!

After attending a lecture on human evolution at a natural history museum, Christina, a young creationist, questions the lecturer and argues against the theory of evolution.

Millions of people stream into Natural History Museums every year where they are presented the idea that life evolved on earth over millions of years. Is there a different view? Yes, there certainly is, and we believe the Bible presents the viewpoint about origins and earth's history that actually fits the evidence. This movie takes on the leading 12 evolutionary icons presented in museums: the Human-Chimp 99% Myth, key ape-to-human icons like *Ardipithecus ramidus*, "Lucy" the *Australopithecus*, *Homo habilis*, Neanderthals, Darwin's Finches, the fossil record and transitional forms, Continental drift and Pangea, Dinosaurs, Whale Evolution, Historical vs. Observational Science, and Deep Time based on Radiometric Dating.

Staged as an interaction between a secular museum docent and a well-versed creationist, the actors go head-to-head on contrasting views over these major evolutionary icons.

**Basic Training on
the false "science"
of evolution!**

**Great training for
students who need
to be able to
defend their faith
in college.**

**Takes on 12
evolutionary icons
presented in
museums!**
