Mr. Spike Psarris

“Our Goldilocks Cosmos”

Did the Universe form in a random, unguided Big Bang event? Or is it instead the work of a Designer? This talk discusses many ways in which the Earth, Sun, Solar System, and cosmos are precisely fine-tuned for us, at all scales; this implies a Fine-Tuner. It then discusses the ways in which secular thinkers try to avoid this conclusion, and how this forces them to embrace and promote models with absurd implications (e.g., the multiverse hypothesis and the alien simulation hypothesis). This falsifies the claim that the secular viewpoint is scientific. The cosmos is not the result of natural processes; it plainly shows the handiwork of our wonderful Creator, as Romans 1 says.

About Spike Psarris: Spike Psarris is a former engineer in the U.S. military space program. He entered that role as an atheist and evolutionist; he left it as a creationist and a Christian. He now speaks and writes on science and Biblical creation, with an emphasis on astronomy and cosmology, and has produced a three-volume video series entitled "What You Aren't Being Told About Astronomy". His website is www.CreationAstronomy.com.
